

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Section 1 - Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

TECH Freire Charter School has been running summer programs for a number of years to support students who need help passing classes in order to get them on track. However, there is targeted outreach for those students who are struggling in school and/or have tested poorly.

This is especially essential for students who failed one or two courses, which threatens their ability to graduate on time. Targeted students are identified by grades, credits earned, test results, and attendance. Summer programs are also available for students looking for a safe and productive way to spend their summer. Last summer, students went on 30 fun and educational field trips. They visited the Museum of African American History in Washington, DC, went to amusement parks, visited college campus, and participated in robotics competitions.

Section: Narratives - Summer School Program Questions

Summer School Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children with Disabilities	Academic Growth	30	Credits recovered
Gender	Academic Growth	50	Credits recovered

3. Describe the evidence-based resources that will be used to support student growth during the summer school program.

Summer program varies year to year depending on student needs and interests, however, a summer constant is TECH's summer school/credit recovery program. Accelerated classes are taught by teachers for students who struggled throughout the year and have fallen short of the traditional graduation pathway. Math and ELA classes are always provided, along with other subjects as needed. In addition to summer school, TECH offers academic enrichment programs and hands-on learning activities. Programming is developed and coordinated by our Student and Community Partnership Leader. Trips to museums, robotics competitions, and amusement parks are organized to give students a safe and productive summer outlet.

4. Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
15	Internal Provider	Staff running classes, organizing trips, summer activities

Number of Staff Members	Internal/Outside Provider	Role
1	Outside Provider	Rec Philly: Community creative entrepreneurship partner

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Participation Tracker	Daily	Serve 100+ Students
Gradebook	Daily	75% of students who attempt credit recovery are successful

6. How will the LEA engage families in the summer school program?

Academic advisors do extensive outreach to families of students who are struggling academically. Towards the end of the school year, they use a variety of communication tools including email, phone calls, and letters to discuss the student's progress to date and to make sure families understand if their child is likely to need credit recovery during the summer. TECH Freire also includes information in communications that are shared with all parents, for example in a weekly newsletter. Parents and students attending summer school programs are able to track progress via our Student Information System parent and student portals.

Section: Budget - Instruction Expenditures

Instruction Expenditures

Budget
 \$40,149.00
Allocation
 \$40,149.00

Budget Over(Under) Allocation
 \$0.00

Budget Summary

Function	Object	Amount	Description
1400 - Other Instructional Programs – Elementary / Secondary	100 - Salaries	\$30,000.00	Summer School Staff Stipends
1400 - Other Instructional Programs – Elementary / Secondary	200 - Benefits	\$3,795.00	Benefits for Summer School Staff: 7.65% of Payroll Taxes, 5% of Retirement Costs
1400 - Other Instructional Programs – Elementary / Secondary	600 - Supplies	\$6,354.00	Summer School Supplies
		\$40,149.00	

Section: Budget - Support and Non-Instructional Expenditures

Support and Non-Instructional Expenditures
